PROJECT:

Father's Name: Mr. V.Elango > Automated Virtual Security Testing Platform for Android Application:

This paper proposes an automated virtual security testing platform for Android

Date of Birth: 05 -08-1998

mobile apps. The testing platform includes three key components: customizing

Android OS to include mobile app trace information, creating a virtual testing

Marital Status: Unmarried platform using the customized OS, and developing static and dynamic analyzing

techniques for mobile malware detection. The proposed testing platform is a server-side malware detection solution. It can utilize both static and dynamic analysis and is

Nationality: Indian a good compensation to the client-side mobile security software.

> Club membership Mini project:

#readytowork

Willing to relocate to: Chennai, Tamil Nadu

## Work Experience

---

### Internship Trainee

lykons business private limited

October 2019 to January 2020

As a Internship Trainee need to study the React Js concepts and created the project related to membership of club registration form, etc.

## Education

---

### Bachelor's in Computer Science

## Skills / IT Skills

---

- Web Designing: Html5, Css3, Javascript
- Web Development: Php, Angular
- Database: MYSQL
- Ability to rapidly built relationship and set up trust.
- Confident and Determined.

- Ability to cope up with different situations. Declaration I hereby confirm that informations that given above is true to best of my knowledge. Place: Vellore Yours Faithfully, (Pavithra.E)
